Ten-minute training draft trial

[R] Run Thursday morning, November 5, with one willing Sailor or officer, preferably familiar with training drafts. The target user is a training coordinator, not a named person. App-second practice limits any benefit claim.

Prepare beforehand [R]: Accepted task app/checker with identity/receipt, stopwatch, card, paper or local spreadsheet. Prefill identical inputs, with B proposed at 0800; leave results blank. Hide the key and, during the app attempt, the baseline answer. Record setup seconds separately. No accepted artifact: record NOT RUN; never substitute the factory/hosted preview.

Synthetic card [R]: All requests last 60 minutes. People/operations are available 0800 to 1200 both days. P01 holds Q-A; P02 holds Q-B. Each has a 120-minute maximum across BOTH days. P01 needs 30 minutes between sessions; P02 needs zero. Everything is invented. Keep all requests, people, rooms and durations; avoid overlaps and use permitted starts.

Request	Permitted start	Person / room / required qualification
A	Day 1: 0800	P01 / Room-1 / Q-A
B	Day 1: 0800 or 0930	P01 / Room-1 / Q-A
C	Day 1: 0800	P02 / Room-2 / Q-B
D	Day 2: 0800	P02 / Room-2 / Q-B

Run and say exactly [R], elapsed session minutes:

- 0:00 to 1:00: "Will you try a ten-minute fictional task? Stop anytime. May we record anonymous results for event evidence? No names, units, real records, photos or recordings. Do you prepare training drafts? Is paper or spreadsheet a fair comparison?" Declined consent: end, retain nothing.
- 1:00 to 4:00, baseline: Reveal card at Go. "Check these requests, correct conflicts, show start/end times and each person’s total minutes. Explain changes. Check your answer, mark it reviewed as a draft, then hand over the paper or save the sheet. Say done. Go." Stop at done or 180 seconds. Freeze output; no answer feedback.
- 4:00 to 4:30: "How easy was that, from 1, very difficult, to 7, very easy?" Reset app to identical inputs, with no solved result visible.
- 4:30 to 7:30, app: Repeat baseline instruction, replacing handover with "save the draft locally." Time Go to done or 180 seconds, including discovery, checks, review, corrections, help, wait and save. No coaching; if asked, say "Use the card and tell me when finished." Count all help.
- 7:30 to 9:00: "How easy was that, 1 to 7? Why change B? Who approves real use? What was hardest? Is this fair to your usual general process?" Summarize anonymously. Interrupt sensitive details: "Please keep to this fictional example."
- 9:00 to 10:00: Score frozen attempts; confirm anonymous summary. No scored retries. Withdrawal, prohibited data or unexpected external action: stop, close app, escalate to Mukul without sensitive details; discard withdrawn results.

Score [R], hidden key: A/C day 1 0800 to 0900; B 0930 to 1030; D day 2 0800 to 0900; totals 120 each. B resolves person/room overlap, preserving 30 minutes rest. Count exact rows /4, distinct failed rule types /8 (starts, duration, qualifications, windows, person/room overlaps separately, rest, minutes limit), row-edit events and help interventions. Success requires all rows once, zero failures, correct totals/explanation, review and retained draft. Timeout means unfinished at 180 seconds. Unknown is blank, not zero.

Blank results [R]	Baseline: paper / sheet	App: solver / checker
Date; consent; task familiarity; fair comparison?	_____	_____
Optional volunteered broad role/paygrade band only	_____	_____
Artifact identity/receipt; device/browser; setup seconds	_____	_____
Timing basis: TIMED or ESTIMATE; elapsed seconds	_____	_____
Included wait seconds; interruptions	_____	_____
Correct rows /4; failed rule types /8; edits; helps	_____	_____
Totals/explanation correct? reviewed? retained?	_____	_____
Success / incorrect / timeout / stopped; ease /7	_____	_____
General process fit; hardest step; approval understood?	_____	_____

Claim [R]: Compare only successful timed attempts; include errors/help. Untimed baseline: ESTIMATE. No Fleet-wide savings. See Burden-Claim.md. Never retain names, contacts, units or identifying anecdotes. Role/paygrade stay blank unless volunteered; omit identifying combinations.
